

HIPP™ - \$3995

Effortless point cloud “noise” reduction with sophisticated thinning features

Connect your reverse engineering design team to industry standard laser scanning devices

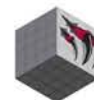

Import scanned point clouds into common CAD software programs

- Easy to use graphical interface with real time scanning display
- Significantly accelerates scan-to-CAD process
- Uncomplicated import/export part alignments
- Restore scanned data on demand
- Import industry standard point cloud formats
- Works with industry standard scanning hardware

Features

- Point cloud noise reduction and size reduction
- Alignment Control
- Model-as-you-go data acquisition
- Import 3D scanned data with object alignments
- Effortless sketch plane noise reduction

*Point cloud processing results vary with PC and scanning hardware configuration
