HighRES Debuts Enhanced Integrated 3D CAD/CAM Reverse Engineering Software Plug-ins for Mastercam X at SEMA Show.

Adds real time inspection and measure features to new HighRES release

October 27, 2005-La Jolla, California—HighRES, Inc., providers of CAD/CAM integrated 3D reverse engineering and digitizing software products, today announced it will debut it's HighRES for Mastercam X, their newly upgraded software interface for digitizing direct in Mastercam at SEMA in Las Vegas, Nevada, November 1-4, 2005 in booth #52115 (Silver Lot Temporary Structure #2).

"HighRES for Mastercam X has been dramatically enriched with powerful new inspection and reverse engineering features, states Braxton Carter, CTO of HighRES, Inc. "By adding inspection to our already robust reversing engineering software, users no longer have to struggle with imported inspection data. Quick alignment of portable CMM data to the already existing CAM file allows users to inspect in inches or metric, automatically probe radius compensation and inspect features such as holes, slots, planes, spheres, cylinder or cones." The new product can be used with industry standard inspection devices such as CMMs, laser trackers or articulating arms (PCMMs).

HighRES for Mastercam integrated 3D reverse engineering software solutions completing eliminate the need to import foreign data from stand alone inspection and RE packages. Users simply click on the floating HighRES toolbar and see the probe collecting or inspecting data on screen, in real time, direct in Mastercam X.

About HighRES, Inc.

HighRES, Inc. develops markets and supports integrated 3D reverse engineering software plug-ins for Autocad, Mechanical Desktop, Inventor, SolidWorks, Pro/ENGINEER, Unigraphics NX, Solid Edge, KeyCreator, Mastercam and 3D digitizing hardware solutions worldwide. Further information on HighRES is available at www.Reverse-it.com, Telephone: 858-488-5231.

About Mastercam

Developed by CNC Software, Inc., Mastercam is Windows®-based CAD/CAM software for 2- through 5-axis milling and turning; 2- and 4-axis wire EDM; 2D and 3D design, surface, and solid modeling; artistic relief cutting, and 2D and 3D routing. CNC Software is a privately owned corporation founded in 1984. The U.S.-based company provides Mastercam CAD/CAM solutions to more than 85,000 installations in 75 countries in industries including mold-making, prototyping, automotive, medical, aerospace, and consumer products. Mastercam runs under Windows 2000, and Windows XP and is compatible with all other CAD/CAM systems. For more information about CNC Software, Inc. and its Mastercam family of products, contact CNC Software, Inc., M - F, 8 AM - 6 PM EST at (800) 228-2877 or (860) 875-5006, 671 Old Post Road, Tolland, CT 06084.
