HIGHRES DELIVERS COMPLETE REVERSE ENGINEERING SOFTWARE SUITE FOR SOLIDWORKS 2001PLUS

Integrates five reverse engineering modules and links to portable CMMs.

April 25, 2002—La Jolla, California—HighRES, Inc. today announced it has shipped FrameWorks, Planeworks, Dataworks, ControlWorks & Axisworks. The fully integrated advanced 3D reverse engineering software suite includes improved functionality and Windows XP compatibility for SolidWorks 2001Plus. This reverse engineering suite provides seamless choices for integrating portable CMM arms and SolidWorks 2001Plus files directly.

"This latest 3D reverse engineering software suite provides more control over your digitizing functions and implements the new HighRES "Smart Units" allowing the end-user to digitize in inches or millimeters," said Braxton Carter, President of HighRES, Inc. "Improved data streaming brings the digitized entities directly into your part file; visualizing the digitizing process on screen while watching your part build in real time. This HighRES release also includes MS Windows XP compatibility and eliminates the need to import data from previous OS systems. By streamlining the digitizing event, integrating the complete bundled solution and offering tiered modular choices, we have significantly increased the value of the reverse engineering application".

The entire HighRES for SolidWorks 2001Plus software suite consists of

3 tiered foundational products and 2 added-value power feature modules.

About HighRES, Inc.

HighRES, Inc. headquarters in La Jolla, California, develops, markets and supports advanced 3D reverse engineering software and 3D digitizing hardware solutions worldwide. Further information is available at www.ReverseEngineering.com

About SolidWorks Corporation

SolidWorks Corporation, a Dassault Systemes S.A. (NASDAQ: DASTY, Euronext Paris: #13056, DSY.PA) company, develops and markets mechanical design software solutions. Founded in 1993, SolidWorks' mission is to unleash the power of 3D for everyone in product development. In six years of shipping product, SolidWorks has shipped more than 175,000 total seats of software worldwide. SolidWorks has offices around the globe and sells, distributes, and supports its products through a network of worldwide resellers.
