HighRES REVERSE ENGINEERING SOFTWARE NOW SHIPS WITH
EVERY ROMER 3000i AND STINGER II PORTABLE CMM IN NORTH
AMERICA

October 14, 2002—La Jolla, California,—HighRES, Inc., providers of CAD/CAM integrated 3D reverse engineering software products, is pleased to announce that ROMER Cimcore is shipping HighRES reverse engineering software with every ROMER 3000i and Stinger II portable CMM in North America.

“HighRES has demonstrated a strong commitment to the reverse engineering community and is currently the only software provider developing multiple CAD/CAM reverse engineering modules. Our customers have asked for seamless CAD/CAM integration and we have successfully provided plug-ins for Pro/ENGINEER, SolidWorks, AutoCAD, Mechanical Desktop/Inventor, Mastercam and CADKEY”, said Braxton Carter, President of HighRES. “We are pleased that five of our plug-ins are being shipped with the ROMER Cimcore portable CMMs.”

About HighRES, Inc.
